

ENVIRONMENTAL POLICY

Slangspecialisten AB works to provide the market with industrial hoses, couplings and special and customised solutions and we see active environmental work as a matter of course in our daily operations.

- When purchasing hoses and related components, propellants and vehicles within the framework of our business concept, we will choose alternatives that are environmentally friendly, ecolabelled or of the latest environmental class.
- We will actively work to reduce our consumption of fossil fuels linked to transport by planning trips with the aim of reducing mileage and having an environmentally friendly driving style.
- We will work on environmentally friendly residue and waste management within the company.
- We will work to ensure that our suppliers and partners have a high level of environmental awareness.
- We will prevent pollution by maintaining and servicing our equipment and handling chemicals safely, and in doing so we are committed to protecting the environment.
- We will take a long-term approach to our improvement work, where internal and external requirements, applicable legislation and other binding requirements concerning the company's environmental aspects are considered and complied with.
