# Texture Transformation

## SMOOTHENING

Smoothing is always-a-better option-than straightening. It makes-hair look natural soft.

## STRAIGHTENING

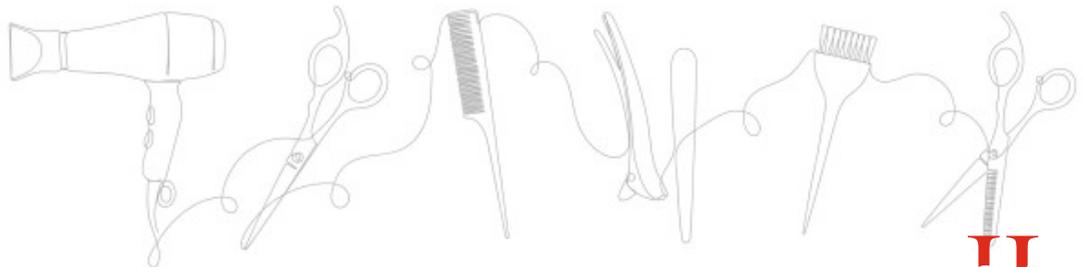

The process of hair straightening involves breaking of chemical bonds in your hair, which are re-arranged and bonded back permanently with the use of chemicals.

## PERMING

The technique by which we change the texture of straight hair to wavy or curly hair, using a chemical is known as permanent curls/waves. Before giving a perm, it is very important to carefully analyse the patron's scalp and hair condition.

## RELAXING

Permanent hair relaxing removes your wavy curls permanently using chemical treatments to give you relax flowing hair without using a style daily.

# Premium Facial

## CLASSIC/BASIC FACIAL

Involves cleansing, exfoliating and moisturising the skin. It's ideal for maintaining general skin health and is suitable for almost all skin types.

## ANTI-AGEING FACIAL

Focuses on reducing the signs of ageing, such as fine lines, wrinkles and age spots. Typically, it involves using antioxidants, collagen-boosting treatments and serums that promote skin regeneration and elasticity.

## ACNE/DEEP CLEANSING FACIAL

Targets the root causes of acne, such as excess oil and clogged pores. It includes deep cleansing, blackhead extraction and anti-acne treatments.

## HYDRATING FACIAL

Designed for dry and dehydrated skin. It uses intense moisturising ingredients like hyaluronic acid to replenish water content in the skin, leaving it soft and supple.

## BRIGHTENING FACIAL

Aims to improve skin radiance and treat uneven skin tones. It typically uses vitamin C, fruit acids and peptides to lighten dark spots and enhance skin brightness.

## CHEMICAL PEEL FACIAL

This involves applying a chemical solution that exfoliates the top layers of the skin, revealing newer, more evenly pigmented skin layers beneath. It treats acne scars, uneven skin tone and ageing signs.

## D-Tan
